UI Test Automation Playground

Quality is not an act, it is a habit.
— Aristotle

The purpose of this website is to provide a platform for sharpening
UI test automation skills. Use it to practice with your test automation
tool. Use it to learn test automation techniques.

Different automation pitfalls appearing in modern web applications are
described and emulated below.

Dynamic ID

Make sure you are not recording
dynamic IDs of elements

Class Attribute

Check that class attribute based
XPath is well formed

Hidden Layers

Verify that your test does not
interact with elements invisible

Load Delay

Ensure that a test is capable of
waiting for a page to load

Dynamic Table

Below you see a table where columns and rows change their position upon page reload. Values in cells are random. The table is based on DIVs with ARIA attributes. See [WAI-ARIA table design pattern](#) for details.

Scenario

- For Chrome process get value of CPU load.
- Compare it with value in the yellow label.

Playground

Task Manager

Name	CPU	Disk	Network	Memory
Firefox	6.9%	0.2 MB/s	2.8 Mbps	1.9 MB
System	0.8%	0.9 MB/s	8.4 Mbps	0.1 MB
Internet Explorer	8.6%	0.2 MB/s	9.3 Mbps	68.6 MB
Chrome	1.8%	0.6 MB/s	0.6 Mbps	67.9 MB

Chrome CPU: 1.8%
